

Workplace Solutions for H1N1.

Fall 2009

Protect your most valuable asset: Your Employees!

The Center for Disease Control and Prevention recommends:

- Influenza may be spread via contaminated hands. Instruct employees to wash their hands often with soap and water or use an alcohol-based hand cleaner, especially after coughing or sneezing.
- Provide soap and water and alcohol-based hand sanitizers in the workplace. Ensure that adequate supplies are maintained. If feasible, place hand sanitizers in multiple locations or in conference rooms to encourage hand hygiene.
- Frequently clean all commonly touched surfaces in the workplace, such as workstations, countertops, and doorknobs.

Direct Safety™ N95 Respirator

A NIOSH Certified N95 Respirator

Maintenance-free N95 masks for economical protection from certain solid and liquid articles, excluding those containing oil. Inner foam provides a custom seal. Dual head straps produce an optimum fit. (174185)
